SECURITY REVIEW

Security Signoff Memo

Workflow: **Support Email Triage Agent (Pilot)**

MEMO NO.	DATE	DECISION
SEC-2026-0090	2026-06-17	Conditional GO

Demonstration artifact generated with realistic placeholder data — not a real client engagement.

Security Signoff Memo

Workflow: Customer Support Email Triage Agent (Pilot) — Northwind Trading Co. This memo records the security review and launch decision for the sandbox pilot. It is not a compliance certification, penetration-test attestation, or legal approval.

01 | Scope of Review

Field	Value
Workflow	Support email triage: classify, draft, route
Environment	Northwind sandbox mailbox + staging helpdesk
Data classes	Customer name, order number, partial address (PII)
External actions	None auto-executed; human approves every send
Review date	2026-06-17

02 | Permissions & Least Privilege

- Read access to the sandbox mailbox only; no production mailbox access.
- Retrieval limited to the approved help-center subset (~90 articles).
- No write/send capability without a human approval action.
- No access to billing systems, payment data, or account credentials.

03 | Risk Findings

ID	Finding	Severity	Status
R-01	Prompt injection via crafted inbound email	High	Mitigated — 0/42 attempts triggered actions
R-02	Stale help-center articles cited in drafts	Medium	Mitigated — stale set excluded from index
R-03	PII present in logs	Medium	Open — restrict log access before launch
R-04	Reviewer approval fatigue at peak volume	Low	Accepted — monitor override rates

04 | Controls Verified

- Human approval gate enforced before every customer-facing send.
- Run logging for classifications, drafts, and overrides enabled.

- Rollback: disable suggestions; team reverts to manual triage.
- Incident contact and escalation path documented.

05 | Launch Decision

Conditional GO for sandbox pilot. R-03 (restrict PII log access) must be closed before the acceptance demonstration. No production mailbox use under this scope. Re-review required before any production rollout.

Approval	Owner	Status
Security review	CompleteTech security review	Signed (conditional)
Residual-risk acceptance	Dana Whitfield, VP Customer Ops	Pending
Production rollout	Out of scope	Requires new review
